### **Township needs leaders with no ties**

It's finally time to say "YES." From an outsider's view point the majority of Bedford Township voters, along with some very fiscally responsible residents, were often considered the "NO" people.

Being an insider, I know that all of the "NO" votes of the past couple of years come from the frustration of the taxpayer. If one would evaluate or explore the various reasons for the voting poll failures, the question of fiscal responsibility was the determining factor as well as the increased tax burden on the township residents. One could certainly debate whether or not any of these millages had sufficient merit to justify their request or placement on the ballot.

It's time to say "YES" at the polls this November. This time Bedford residents will have the opportunity to say yes to a better Bedford. This community does not need more of the same administration, more of the forgotten promises, more poor decisions

or more embarrassing township hall meetings. It needs new eyes with no ties, young people with a vision willing to save the taxpayers money, and people willing to use a no limits mind set.

It also needs people willing to reduce the tax burden and create an environment conducive to new businesses in Bedford.

And finally, our community needs a law enforcement program focused on the drug epidemic and a serious emphasis on decreasing crime in Bedford as well.

We need new eyes to bring professionalism back to our township and make our community a better place to live and bring back the pride ... .

Look hard at your choices for township board and school board this November. It's time to say "YES" to "NEW EYES WITH NO TIES!"
