

## ***Solutions for Bedford Township Roads***

Results of the Discussion from the Town Hall Meeting  
June 5, 2014

1. Communication, communication, communication – It was said many times and loud and clear, the Township Board needs to communicate with the Public.
2. Coordinate trash pick-up days and vendors in order to save wear and tear on the roads with many heavy trucks working on the same days.
3. Change the Road Commission Policy (MCRC) on Special Assessment Districts (S.A.D.'s)
4. County Commissioners should reinstate the Self Help Program.
5. Fines for overweight trucks should be used on road improvement not be given to the Library.
6. Change Act 51, the statute that regulates road commissions and road funding. It is outdated and not effective for current standards.
7. Township Board should apply surplus dollars in the budget at end of each fiscal year toward roads.
8. Need dollars from local residents for local roads either by millage or special assessment.
9. Reduce load limits on roads and enforce them.
10. Community needs to coordinate efforts and work together to demand improved road funding, maintenance and construction.
11. Reduce speed limits on Samaria, Jackman and Secor Roads – this would need approval from the State Police and MCRC who set limits.
12. School buses to Monroe Road Elementary should not use Clegg Road as it is not built for that much traffic.
