Bedford Township Trustee

# What I Believe

I believe in **Transparency!** Local government is the heartbeat of all government. It is where the taxpayers can personally contact the people who make decisions concerning our lives.

I believe local government exists to accomplish three things.

1. Promote public safety
2. Maintain infrastructure
3. Promote economic development

The revenue provided by local taxpayers that funds local government should be closely guarded by elected officials and budgeted to meet the needs of the public.

I believe it is a privilege to serve the public. Local government needs people who:

1. Understand the position to which they have been elected to serve;
2. Demonstrate service and not superiority;
3. Are willing to research, pursue and find solutions for the future of the community.

I believe there is no "I" in Team. Bedford deserves a team working together to improve infrastructure (including roads), reduce taxes when possible by promoting economic development, and continuing to promote public safety.
